## New Custom Field

### Step 1. Choose the field type

Specify the type of information that the custom field will contain.

#### Data Type

☐ None Selected

☐ Auto Number

☒ Formula

Roll Up Summary

☐ Lookup Relationship

☐ Master-Detail Relationship

Select one of the data types below

A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

Creates a read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

SETUP  
Tabs

Custom Tabs

Help for this Page

You can create new custom tabs to extend Salesforce functionality or to build new application functionality

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

### New Custom Field

Help for this page

#### Step 2. Choose output type

Step 2 of 6

Previous Next Cancel

Field Label **Candidate Role Number**

Field Name **Candidate\_Role\_Numbers**

Auto add to custom report type ☒ Add this field to existing custom report types that contain this entity

#### Formula Return Type

☐ None Selected

☐ Checkbox

☐ Currency

☐ Date

☐ Date/Time

☐ Number

☐ Percent

Select one of the data types below

Calculate a boolean value

Example: `TODAY() > CloseDate`

Calculate a dollar or other currency amount and automatically format the field as a currency amount

Example: `Gross Margin = Amount - Cost__c`

Calculate a date, for example, by adding or subtracting days to other dates

Example: `Reminder Date = CloseDate - 7`

Calculate a date/time, for example, by adding a number of hours or days to another date/time

Example: `Next = NOW() + 1`

Calculate a numeric value

Example: `Fahrenheit = 1.8 * Celsius__c + 32`

Calculate a percent and automatically add the percent sign to the number

Example: `Discount = Amount / (Amount + Amount__c) * 100`
